Since its founding in 1939, Hanyang University has established itself as a prestigious private institution and fostered talented people with outstanding capabilities and visions. As the driving force behind the development of Korea, these talents have stood at the forefront of dynamic innovation in various fields of society.

At this momentous time when the energy of dynamism surges in anticipation of Hanyang's 100th anniversary in 2039, our historical mission and pride is to nurture leaders of challenges and exploration who will transform the world.

To foster creative talents that will lead the 4th Industrial Revolution era, Hanyang University is strengthening convergence education and research that cross the borders of capabilities beyond the inflexible educational frameworks of the past. We are also advancing industry-academia collaboration based on practical education. Furthermore, we are driving our quest for a stronger global status and a broader reach and making sure to lead in sustainable social innovation.

Moreover, Hanyang University will be committed to nurturing experts who will contribute to the prosperity of the nation and humankind through the core value of "Love in Deed and Truth" that has been the spirit of Hanyang throughout history.

Hanyang University will advance further as a world-renowned university by nurturing creative global talents based on world-changing education and research, as well as "Love in Deed and Truth."

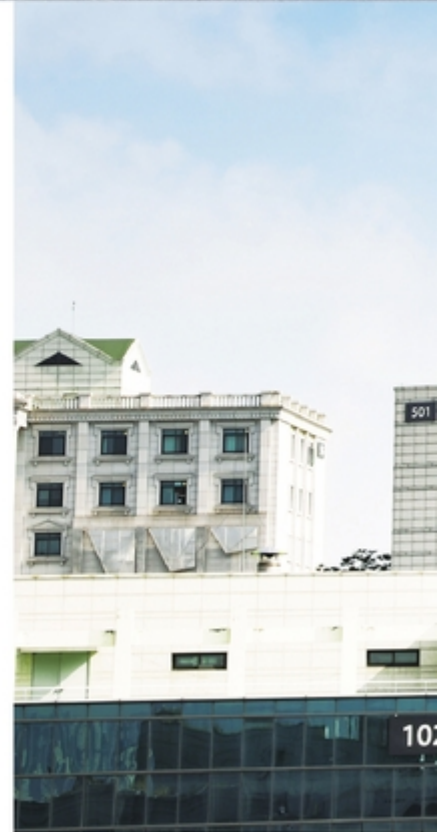

Hanyang University President
Lee Ki-jeong

이 기 정

Founding Philosophy **'Love in Deed and Truth'**

Hanyang University educates its students to understand and practice love. This fosters talented individuals with the virtues of diligence, honesty, humility, and service. We instill the value of love so that our students contribute to their local community, to their country, and to humanity at large.

Educational Philosophy

'Love in Deed and Truth' is the founding principle and the educational philosophy of Hanyang University. It has been a driving force for cultivating graduates equipped with the virtues of diligence, honesty, humility, and service.

Educational Goals

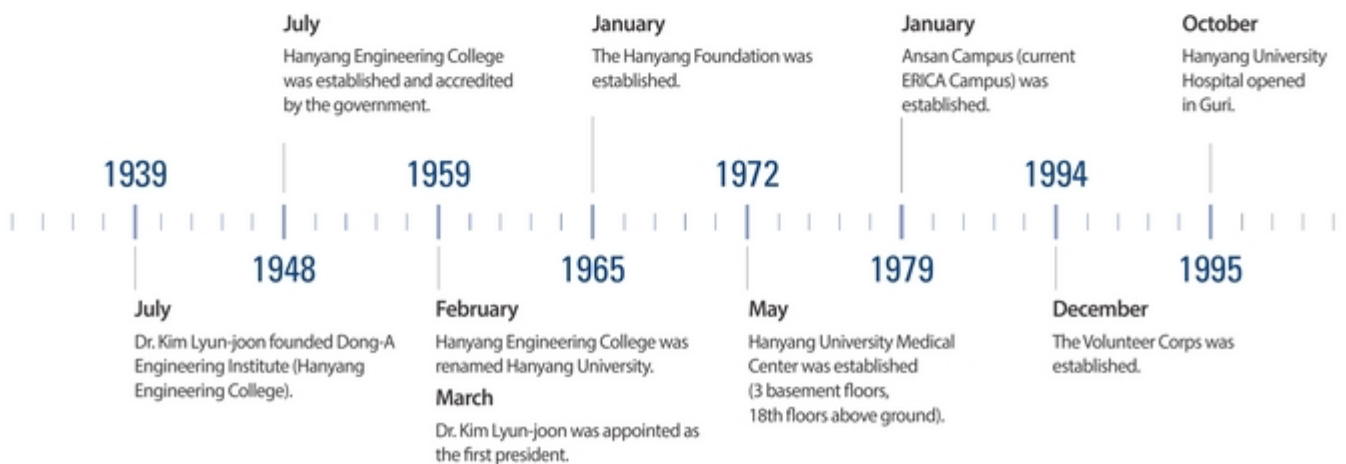

The main goal of Hanyang University is to nurture competent graduates who possess the knowledge and skills that will help them accomplish their own ideals, ultimately making them capable of leading contributions to the prosperity of the nation and the world.

Educational Purposes

- To foster knowledgeable students who are also diligent, honest, and modest, by providing a wide range of learning opportunities;
- To nurture professionals and specialists who are equipped with both in-depth knowledge and technical skills in their fields;
- To educate individuals who can apply their practical knowledge in and for society;
- To cultivate global leaders who understand cultural diversity and can play active roles in international communities;
- To train service-oriented individuals who serve the development and prosperity of society, both nationally and internationally.

The path that Hanyang has walked, reflects the development of Korea

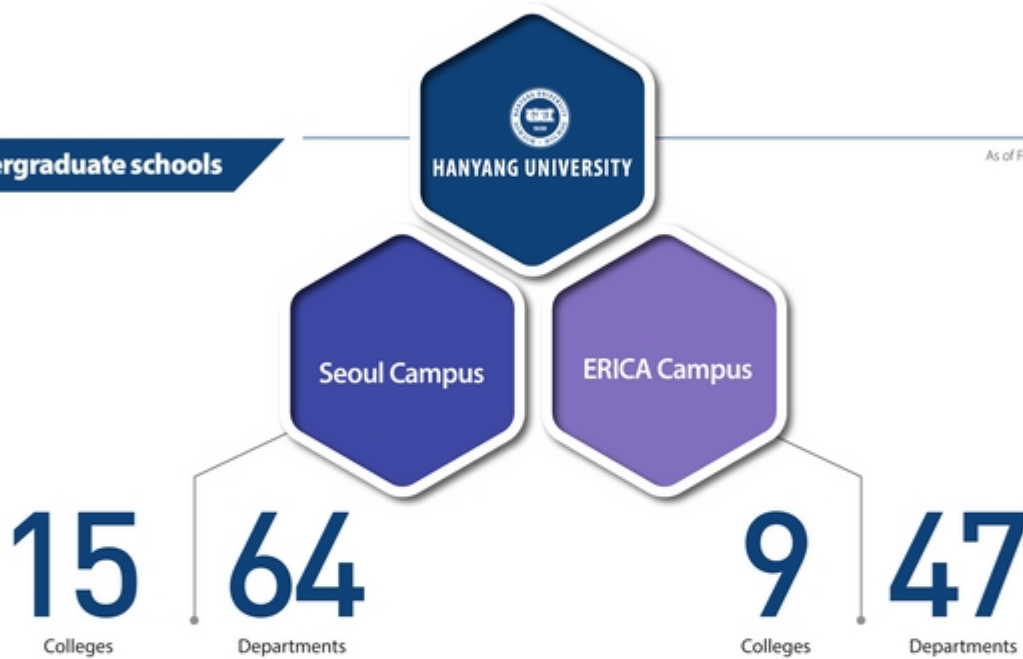

Hanyang is pioneering a brighter tomorrow with powerful vision and strategies. We are taking the lead in the era of the 4th Industrial Revolution by fostering leaders who can contribute to humanity to bring about a hopeful future.

The Best for a Better World

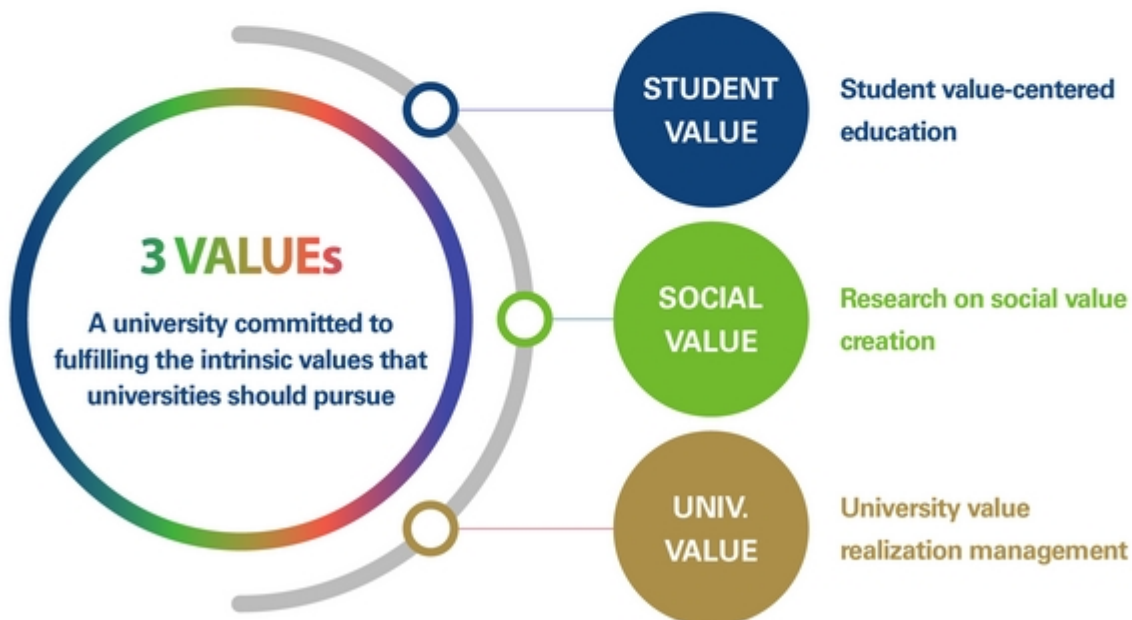

HANYANG VISION 2030

Hanyang University's vision is to respond to the rapid social changes brought about by the Fourth Industrial Revolution, and to help make the world a better place.

[The Best for a Better World]

To this end, Hanyang University has selected three values (THREE VALUES: Student value-centered education; Research on social value creation; University value realization management) based on "education and research," the true role of universities, and has established nine strategies and 33 strategic tasks to achieve it.

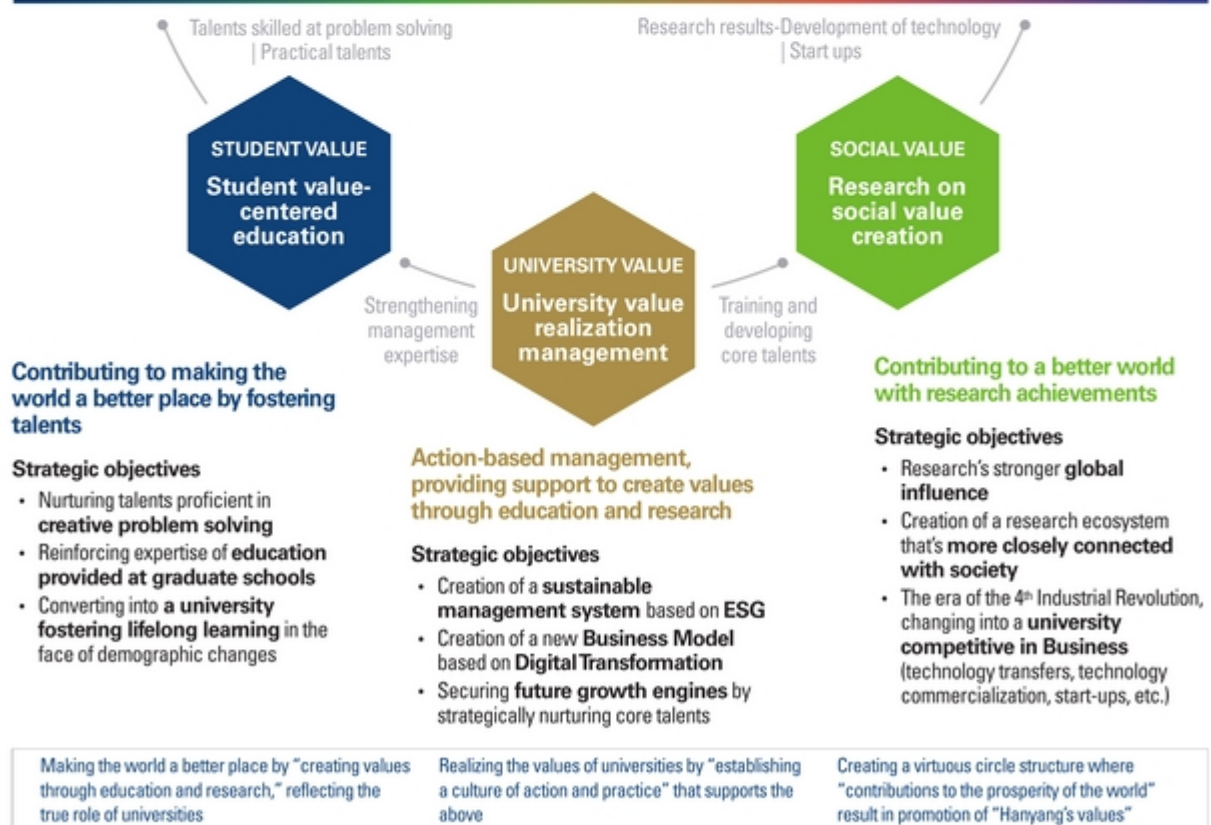

HANYANG VISION 2030

The Best for a Better World

A university that creates sustainable values through education and research

An aerial photograph of the Hanyang University campus in Seoul, South Korea. The image shows a large, modern university complex with various buildings, green spaces, and a central courtyard. In the background, the dense urban landscape of Seoul is visible, with numerous high-rise buildings and a clear blue sky with scattered white clouds. The foreground shows a mix of university buildings and surrounding city structures.

Hanyang University Creating a New World through Continuous Challenges and Growth

Established as the Dong-A Institute of Technology in 1939, Hanyang University has become Korea's representative prestigious private institution.

Preparing for its 100th anniversary of establishment, Hanyang is creating a better world and future as a global leader that can guide us through the era of the 4th Industrial Revolution.

Educational innovation to cultivate future leaders

Hanyang University is constantly striving to foster creative and talented individuals vital to the era of the 4th Industrial Revolution. We are leading true educational innovation through a great deal of investment and support for the latest teaching methodologies, programs, and cutting edge facilities.

Operation of customized courses for social needs

The Industry Advisory Board (IAB) is composed of seven or more members outside the university and is operated by the all departments of Seoul and ERICA Campuses. It advises on the overall curriculum and departmental operations to meet societal demands.

Operation of courses utilizing the latest teaching methods

- **Smart Course Flipped Learning, Blended Learning:** studies theories online and carries out student-based activities such as debates and team projects offline
- **HY-LIVE ver. 3.0 Class Model:** Hanyang University is the first in the world to use telepresence technology to introduce interactive teaching for university education between teachers and students located far apart from each other, creating an illusion that they are in the same space. We are continuously upgrading the environment in which the courses take place to maximize presence and can maximize the effectiveness by engaging students in experiments with VR technology as well as holograms.
- **Industry-Coupled Problem Based Learning (IC-PBL) course established:** IC-PBL is an Industry-Coupled Problem Based project lecture method designed to enhance various abilities required of future leaders, such as problem solving abilities, flexible thinking skills, creativity, cooperation abilities, and communication skills.
IC-PBL classes will allow students to cooperate to find real problems that society and industries are facing, actively search for solutions, and bring results that will positively affect society.

Activation of convergence education for the cultivation of creative students

- **Operation of multiple-major system:** used by approximately 20% of graduates
- **16 Convergence Majors:** Big Data Convergence major, Start Up Convergence major, Future Humanities Convergence major, Social Innovation Convergence major, etc.
- **20 Micro Majors:** Fewer requirements compared to multiple majors. Techno-management micro major, Financial Instrument micro major, Art Technology micro major

Expansion of creative hands-on spaces

- **CP Factory:** An Industry 4.0 research and learning platform that provides a smart factory system
- **Fab Lab:** A fabrication laboratory where students can experiment with their technical ideas and put them into practice
- **Imagine X-lab:** A technology design education and research center that utilizes VR/AR equipment
- **Business Lab:** A preparation area where start-up ideas are created and developed
- **Hanyang Art Theater:** A cultural art space where performances and training sessions are held to foster creative artists
- **HY-Tube Contents Factory:** A space for students to create contents, provided for various kinds of infrastructure for real-time live streaming and tools for video production and editing
- **White Horizon Studio:** A multi-purpose studio that can send out HY-LIVE lectures; and film, edit, and live-stream videos with up-to-date infrastructure
- **HY-LIVE VR Lab:** A VR practice room linked with various labs and practice-based courses and a classroom equipped with multi-display for overall monitoring of multiple practice rooms, and a transmit/receive system that enables the holding of multilateral HY-LIVE classes
- **XR Coding Lab:** A space equipped with high-end PCs and matrix equipment for various coding practices, and a cooperative coding room where instructors can monitor students' works in real time

The Way to The Future of Hanyang

한양의 미래로 가는 길

Building a sustainable **R&D ecosystem** by strengthening industry-university cooperation

The core of research with future growth potential and sustainability is 'convergence.'

Hanyang University will establish various fusion research organizations to create synergies between academic disciplines, and will create a new research ecosystem by establishing a industry-university cooperation system with many companies.

Convergence between disciplines to secure future research growth engines

Hanyang University has established the MEB (Medicinal Engineering and Bio) Center, a medical convergence center for fusion research in the fields of medicine, engineering, science, and pharmacy. Through the MEB Center, specialized in the life sciences necessary for the future, we will attempt convergence research and exchange among college students and create synergy through academic convergence.

Convergence between industry and university to create a sustainable research ecosystem

Hanyang University operates the Industry University Collaboration Center (IUCC), an industry-university cooperation center that focuses on long-term research that companies cannot pursue. Through the membership of the IUCC, an industry-academia cooperation R&D center, the university focuses on research and education on the basis of stable finance, in addition to the company obtaining the necessary information and research results.

IEQAS

Acquired IEQAS for attracting and managing international students

Selected for 12 consecutive years since 2011

Fostering global intellectuals who can play an active role in the international community

Hanyang University cultivates global intellectuals by assigning mandatory courses in global language and culture, adopting English-specific curriculums, and introducing various internationalization programs. In addition, we have established a global startup base in Shanghai, China, for employment and start-ups.

Providing the best global education environment in Korea

More than 1,000 exchange students and visiting students come to Hanyang University. Hanyang also operates the largest international summer/winter school in Asia, which is attended by over 1,500 students in each intake.

Strengthening the support for international students with various programs

Hanyang University provides practical help for international students from enrollment, bachelor's degree management, scholarship programs, international student events, and counseling. Additionally, Hanyang provides employment education and a job fair for international students, and organizes international students' alumni meetings to help students successfully enter the society as Hanyang alumni.

Cultivation of intellectuals who can practice love and resolve social issues

Hanyang University's steps to create a better world are unending. Based upon its founding philosophy of 'Love in Deed and Truth,' Hanyang continues its meaningful activities to change the world around us and fulfill social responsibilities.

In addition, Hanyang established the Social Innovation Center to foster socially innovative talents and drive global social innovation and is at the forefront of providing social value creation education.

Love

Established a Volunteer Corps to fulfill the social responsibility of the university

Hanyang established the first Volunteer Corps in Korea in 1994. In 2012, Hanyang established the first alumni community service group. Through this, Hanyang aims to cultivate intellectuals who promote the university's founding philosophy of 'Love in Deed and Truth' to fulfill the social responsibility of the university.

Love in Deed and Truth

Hanyang was the first university in Korea to adopt volunteer works as a class subject. In addition, Hanyang has created an environment in which everyone can realize the university's founding philosophy of 'Love in Deed and Truth' through the operation of 'Hanyang Hope,' a volunteer group consisting of students.

Stronger connection between social services and social innovation

On January 1, 2017, the Center for Social Innovation was established with the conviction of social innovation as a modern reinterpretation of 'Love in Deed and Truth.' Through this, Hanyang not only focuses on existing social service activities, but also expands its scope of activities into social innovation that focuses on solving problems around the world.

Action

The first university in Korea to join ASHOKA U, the Global Social Innovation University Network

In 2018, Hanyang University joined the ASHOKA U network with other global universities to lead in social innovation. Hanyang University became the first Ashoka U Changemaker Campus in East Asia, fully recognized for its ability to change the world into a better place based on the establishment of the university's founding philosophy of 'Love in Deed and Truth.' The social innovation curriculum incorporates bachelor's, master's, and doctorate degrees.

Opportunity to share social innovation with young leaders from various countries

Hanyang provides young leaders with an opportunity to broaden their horizons through social innovation. Before the Covid-19 pandemic, Hanyang held the annual Asia-Pacific Youth Exchange Program, Social Venture Youth Exchange Program, and the "Seventeen Hearts Festival" every year for students to share social innovation achievements with one another and interact with youths from different countries. Since COVID-19, the program has been switched to online not to lose interest in solving social problems. Hanyang continues to contribute to promoting students' awareness on SDGs.

Operation of HUGE, the social innovation platform, and creation of various extra-curricular programs for social innovation

Hanyang University operates "HUGE (Hanyang University for Global Engagement)," a platform for students to use their creative ideas to resolve social issues. Hanyang has also created a variety of extra-curricular programs to give students an opportunity to contribute to making the world a better place, and resolving social issues.

Change

Publication of SSIR, an academic journal for global social innovation, to create social values and reinforce students' capabilities

After signing an exclusive contract to publish Korean versions of the journal in 2018, Hanyang University is researching/translating articles published overseas and domestic collective impact cases and distributing them to members of the social innovation ecosystem in Korea (quarterly, around 150 different institutions). The Korean version of SSIR not only provides translations of major articles published overseas, but also serves as a critical platform that researches domestic examples of social innovation/social contributions and distributes them as articles overseas. Students of Hanyang are given an opportunity to translate selected articles into Korean and write articles for domestic cases to acquire hands-on experience, stronger capacity, and develop their careers.

"SDGs Changers Lab," a project that creates textbooks and teaching materials to foster adolescent changemakers

Through the project, Hanyang University has created a number of textbooks and teaching materials such as PLAY AID KID; Maker Play Board Game; SDGs Literacy Board Game Social Innovation Thinking Tool; Exciting Planet Expedition; and Imagine, Make, and Solve — to bring youths closer to SDGs and social innovation and is leading education on social innovation through relevant programs.

2022, 7th Seventeen Hearts Festival

The 7th Seventeen Hearts Festival nurtures change-makers with interest in and responsibility for social issues and local communities and became a place of exchange for them. It shares its accomplishments and efforts on social innovation and contributions with members and partner organizations.
